

Delta Drone America opens an office in Denver (Colorado, USA)

Denver, Colorado, 17 February 2016

Just a few months after incorporating the company Delta Drone America Inc., registered in the state of Delaware, Delta Drone announces its first physical presence on America soil, under the aegis of Delta Drone America and located in Denver, Colorado.

Operational management of Delta Drone America has been entrusted to Dominique Lavault who, until now, worked at the head office in Grenoble.

Dominique joined the Group in late 2012, and he first worked on developing training programs for the Ecole Française du Drone – EFD based on his experience as a private plane pilot.

His IT background then brought him to work on various projects before becoming the supervisor for the development of the data and deliverables processing chain for the inspection of cellular-telecommunications network antennas and, more generally, anything involving the inspection of tall infrastructures.

On the commercial side, the Denver office will also be home to Jessica Howard, who will be in charge of sales development.

A US national, Jessica has extensive experience as a business-development manager, both within US companies and as an independent consultant, mainly on the US market.

The setting up of the Denver office is part of the plan to finalize, including within the framework of partnerships with US players, several commercial contracts in both the mining/quarrying and industrial-inspection sectors.

About Delta Drone: *The Delta Drone Group is a renowned player in the field of civilian drones for professional use, located in France, the United States, Morocco and South Africa. It offers a complete service, from data acquisition to data processing through a specifically developed information system, including a supply of professional pilots. These pilots are trained and certified by the Ecole Française du Drone, a subsidiary of the Group.*

Delta Drone is listed on the Alternext market of Euronext Paris.
