

## **Delta Drone ISS improves management of visitor flow at the 2019 French Grand Prix - Formula 1**

*Dardilly, 26 June 2019*

For four days, the culmination of which was the race on Sunday, 23 June, the Formula 1 World Championship was held at the Paul Ricard du Castellet (83) track for the 60<sup>th</sup> French Grand Prix, attracting 135 000 spectators.

This year, the organizers, working closely with the authorities and security forces, wished to innovate by bringing in Delta Drone ISS to set up several tethered drones reporting in real time to the COD (Departmental Command Center). This system was mainly deployed to manage visitor flow around the track, but it also allowed the security forces to stay better apprised of any incidents that might have happened requiring their intervention.

Commenting on this new assignment, Didier Ferrara, head of Delta Drone's ISS department, said, "A Formula 1 Grand Prix is a major event and always highly publicized, requiring special security measures. Once again, after the Ferté-Alais Air Show, the Bol d'or, the Ryder Cup and the Paris Peace Forum, Delta Drone proved itself, working alongside the significant forces involved, both private and public, to ensure a successful event. These consecutive assignments have given us invaluable experience that starting to be recognized, even internationally."

**About Delta Drone:** *The Delta Drone Group is a renowned international player in the field of civilian drones for professional use. It offers a complete service, from data acquisition to data processing through a specifically developed information system, including a supply of professional pilots.*

*Delta Drone is listed on Euronext Growth Paris – ISIN code: FR0011522168*

*Are also listed on Euronext Growth Paris:*
